omnikom

PLATFORM OFFER

A website that gets found. A CRM that holds every enquiry. Run by us. Owned by you.

Your website. Your leads. Yours to keep.

Omnikom builds your website on its platform, puts every enquiry in a CRM you log into, keeps you visible on Google and in AI answers, and runs the hosting. If you ever leave, you leave with the code.

What you get

One login. Three screens: leads, site, settings.

01 **A website built for you, on your domain**
A page per place and service. Fast on phones, readable by Google and AI.

02 **Every enquiry in your CRM, instantly**
Sorted by what they asked for. Status, owner, notes, timeline.

03 **An alert to the person who should act**
One email: the answers and a link to the lead. Your name on it.

04 **Your words and photos, changed by you**
Edit, post, publish. Every version kept, anything undone.

05 **Your Google numbers, dated, plain**
How often you are shown, the clicks, the searches behind them.

LATER, IF YOU WANT THEM

Concierge calls that book the meeting. Meeting texts and emails. Export and import in your own CRM's format.

THE PATH OF ONE ENQUIRY

01 **A visitor fills a form on your website**
Signed on the way out, so nothing can be forged from outside.

02 **It lands in your CRM**
Before the visitor has closed the page.

03 **Your team is alerted by email**
Status, owner and notes go back on the lead's timeline.

How it happens

Seven steps to live, each ending with something you can see and check. Then every month.

	STEP	WHAT WE DO	WHAT YOU GET	TAKES
01	Audit	Your website, Google results, AI answers, listings, reviews and your real local competitors. A "before" snapshot is saved.	A scored report, every fact sourced	2 to 3 days
02	Draft	Your new site from your own content, every form wired to your CRM.	A private preview, hidden from Google	1 to 2 weeks
03	Review	Legal pages and consent text drafted; every promise on the site listed for you and your lawyer.	A site you approved in writing	Your pace
04	Launch	Old addresses forwarded, every page checked, every form tested; the old site stays up until the new one passes.	Live on your domain, your login	1 to 2 days
05	Listed	Sitemap to Google and Bing, your Google Business Profile verified, your details matching everywhere.	Every listing pointing at you	First week
06	Tune	The searches each page targets, watched; pages fixed where Google shows the wrong one.	The tracking report	One week
07	Mentions	Trusted websites in your field name and link to you. Clean methods only.	The mentions won, the next to go after	From launch on
∞	Growth loop	Measure, improve, measure again until free traffic from Google and AI answers levels off. Ads only then.	One report a month: what moved, what changed, what is next	Every month

Measured, not promised

What the platform has already done, with where the number comes from.

99 mobile

Google PageSpeed, phones

The latest site built on the platform, five pages: 99, 99, 97, 99, 98. PageSpeed Insights, 29 October 2026.

100 desktop

Google PageSpeed, computers

100 on all five pages. Same measurement, same day.

126 of 126

Break-in attempts caught

Our test suite tries 126 ways to read one client's data as another. Every one is stopped. Local run, 29 October 2026.

100 a11y

Accessibility, every page

Google Lighthouse accessibility score, 100 on all five pages. Same measurement, same day.

Every form is signed. A lead can only come from your website.

Every change is versioned. Nothing is lost; anything can be undone.

Every secret is encrypted, every night backed up. Hosting, deployment and Search Console run on our accounts.

What it costs, and what leaving costs

No price list: no two businesses need the same work. The same for everyone: what you get, and how you leave.

ONE TIME

The setup

Quoted after the audit

Steps 1 to 7, from the audit to the first mentions. One price, agreed before we build.

MONTHLY

The growth loop

Quoted with the setup

Measuring, improving, new pages, mentions, the monthly report, and the platform itself: hosting, dashboard, CRM, security, updates.

MONTHLY, EACH

Add-ons

Rent per add-on

Concierge calls that book meetings, meeting texts and emails, export and import in your CRM's format. Each priced on its own. Stop any one, any time.

IF YOU LEAVE

Yours, the day you go

The full code of your website

Handed over on request. No charge. Take it to any host.

The site stays live with us

For a flat hosting fee, written in your quote. Cancel any time.

Your login, CRM and every lead

New enquiries keep landing. Export whenever you like.

Only what you stop, stops

The growth loop, the reports, the mentions, the add-ons.

Your brand in front. Ours underneath.

Every email the platform sends carries your name at the top and a small "powered by Omnikom" at the foot. We are not hidden, and we are not in your way.

NEXT
1. A short call

Thirty minutes. Where you want customers from, and what we see today.

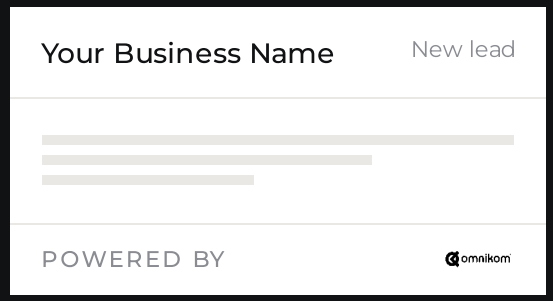

THEN
2. The audit

Two to three days. The scored report is yours whatever you decide.

THEN
3. Your quote

One price for the setup, one for the growth loop. Then we build.

WHAT A LEAD ALERT LOOKS LIKE

Your name on top. Ours at the foot, the way any service you trust signs its work.
